Excellent at multitasking with extensive computer aided design for medical devices; High-level performer with attention to detail; Exceptional from concept to implementation of clinical products; Successful track record

EDUCATION

North Carolina State University

BS Biomedical Engineering (3.5 GPA, Magna Cum Laude)

I prefer "professional summary" over an objective

8/05 – 5/09

Senior Design Project was to build a hands free goniometer using accelerometer based technology. The problem was derived by my student team during a clinical-needs assessment at WakeMed. The project followed a five-phase design control process that emulated the FDA's quality system regulations. We maintained a Design History File while completing deliverables from initial concept development through manufacturing and qualification.

WORK EXPERIENCE

Company XYZ – Job Title, Location

6/07 – 6/08

Duties include: List duty one here; Briefly explain another duty here; Don't use full sentences to explain each of these duties; Provide quantitative and qualitative details, if possible

Company XYZ – Job Title, Location

Note the consistency

6/07 – 6/08

Duties include: List duty one here; Briefly explain another duty here; Don't use full sentences to explain each of these duties; Provide quantitative and qualitative details, if possible

Company XYZ – Job Title, Location

O.K. to include non-relevant jobs

6/07 – 6/08

Duties include: List duty one here; Briefly explain another duty here; Don't use full sentences to explain each of these duties; Provide quantitative and qualitative details, if possible
